

2017

NATIONAL CANNABIS SUMMIT

SCIENCE, POLICY AND
BEST PRACTICES

August 28-30, 2017 | Denver, CO

www.NationalCannabisSummit.org

#Cannabis17

ABOUT THE SUMMIT

Few legislative and regulatory issues in the United States are as polarizing as cannabis, but there is no denying that it is being medically and recreationally legalized in many states. In 2016, nine states had medical and recreational cannabis-related questions on their ballots.

Currently, 29 states and the District of Columbia have legalized the medical use of cannabis. Eight states and the District of Columbia have legalized cannabis for recreational use. State and local governments, advocacy groups, medical professionals and consumers are vigorously engaged in conversation on the topic.

The National Cannabis Summit provides an objective national platform for these stakeholders to come together to discuss policies and regulatory approaches to enhance public health and safety, advance research and improve prevention and treatment to respond to changing cannabis policies.

29 STATES &
the District of Columbia
legalized the medical
use of marijuana

9 STATES
had medical and recreational
cannabis-related questions
on the ballot in 2016

The opinions expressed in the Summit presentations are the views of the presenters and do not reflect the official position of the Advocates for Human Potential, Inc., Addiction Technology Transfer Center Network/ Substance Abuse and Mental Health Services Administration and National Council for Behavioral Health. No official support or endorsement of the partner organizations for the opinions described in this document is intended or should be inferred.

PARTNER ORGANIZATIONS

Advocates for Human Potential, Inc. (AHP), in collaboration with the Addiction Technology Transfer Center (ATTC) Network and the National Council for Behavioral Health (National Council) are convening the National Cannabis Summit to address the science, policy and best practices on public health and governance in an age of cannabis legalization and decriminalization.

For more than 30 years, Advocated for Human Potential, Inc. has focused its people, passion and expertise on creating practical solutions to improve health and human services' systems of care and business operations. Every day, AHP works to develop real-world solutions for systems change through its areas of expertise, including substance use disorders, mental health and behavioral health policy.

The Addiction Technology Transfer Center Network promotes adoption and implementation of evidence-based, recovery-oriented, culturally appropriate practices for people who have, or who are at risk of developing, substance use disorders. Established in 1993 by the Substance Abuse and Mental Health Services Administration (SAMHSA), the ATTC Network is comprised of 10 Regional Centers, four National Focus Area Centers and a Network Coordinating Office dedicated to unifying science, education and service to transform lives in a recovery-oriented system of care.

The National Council for Behavioral Health is the unifying voice of America's mental health and addictions treatment organizations. Together with more than 2,900 member organizations, serving 10 million adults, children and families living with mental illnesses and addictions, the National Council is committed to all Americans having access to comprehensive, high-quality care that affords every opportunity for recovery.

SCHEDULE AT A GLANCE

SUNDAY, AUGUST 27

2:00 PM – 6:00 PM	Registration Open	Colorado Foyer
-------------------	--------------------------	----------------

MONDAY, AUGUST 28

8:00 AM – 4:00 PM	Registration Open	Colorado Foyer
9:00 AM – 6:30 PM	Poster Presentations Open	Colorado Foyer
9:00 AM – 10:30 AM	Welcome and Opening Keynote Session Featuring John F. Kelly, Ph.D.	Colorado Ballroom
10:30 AM – 10:45 AM	Coffee Break	Colorado Foyer
11:00 AM – 12:00 PM	Breakout Sessions	Various
12:15 PM – 1:15 PM	Lunch & Learn Sessions*	Various
1:45 PM – 2:45 PM	Breakout Sessions	Various
2:45 PM - 3:00 PM	Break	Colorado Foyer
3:00 PM – 4:00 PM	Keynote Session Featuring Jonathan Caulkins, Ph.D.	Colorado Ballroom
4:00 PM - 5:00 PM	Keynote Session Featuring Hilary Karasz, Ph.D., M.A., and Beau Kilmer, Ph.D.	Colorado Ballroom
5:00 PM - 6:30 PM	Networking Reception and Poster Speaker Presentations	Colorado Foyer

*Pick up your box lunch from the Colorado Foyer and proceed to your Lunch & Learn Session.
Please enjoy your lunch in a more relaxed and interactive learning environment.

SCHEDULE AT A GLANCE

TUESDAY, AUGUST 29

8:00 AM – 4:00 PM	Registration Open	Colorado Foyer
9:00 AM – 10:00 AM	Keynote Session Featuring John Carnevale, Ph.D. (moderator) Rick Garza and Lewis Koski, M.B.A.	Colorado Ballroom
9:00 AM – 11:00 AM	Poster Presentations Open	Colorado Foyer
10:00 AM – 10:30 AM	Coffee Break and Poster Speaker Presentations	Colorado Foyer
10:30 AM – 11:30 AM	Breakout Sessions	Various
11:45 AM - 12:45 PM	Lunch & Learn Sessions*	Various
1:00 PM - 2:00 PM	Breakout Sessions	Various
2:00 PM - 2:15 PM	Break	Colorado Foyer
2:15 PM - 3:15 PM	Keynote Session Featuring Susan Weiss, Ph.D.	Colorado Ballroom

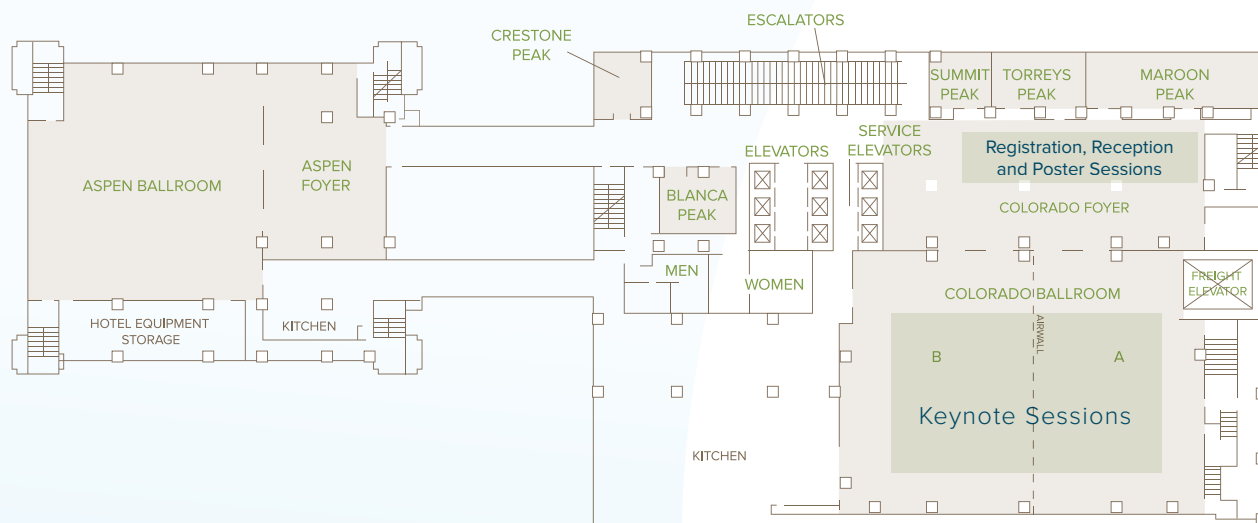

WEDNESDAY, AUGUST 30

8:00 AM – 11:30 AM	Registration Open	Colorado Foyer
9:00 AM – 10:00 AM	Breakout Sessions	Various
10:00 AM - 10:15 AM	Coffee Break	Colorado Foyer
10:15 AM – 11:15 AM	Closing Keynote Session Featuring Andrew Freedman, J.D.	Colorado Ballroom
11:15 AM	Summit Concludes	

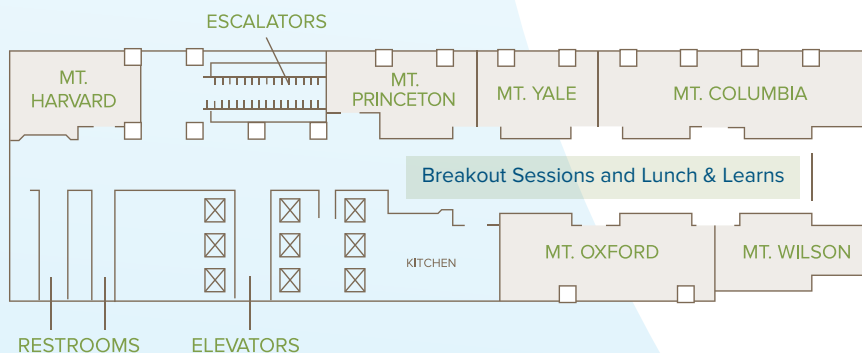

*Pick up your box lunch from the Colorado Foyer and proceed to your Lunch & Learn Session.
Please enjoy your lunch in a more relaxed and interactive learning environment.

HOTEL MAP

SECOND FLOOR, REGISTRATION, KEYNOTE SESSIONS, RECEPTION AND POSTER SESSIONS

THIRD FLOOR, BREAKOUT SESSIONS AND LUNCH & LEARNS

HILTON FOUNDATION SUPPORT

CONRAD N.

FOUNDATION

AHP, ATTC and the National Council would like to thank the Conrad N. Hilton Foundation for their generous support of the Prevention Sessions for the National Cannabis Summit.

SESSION HANDOUTS

Session handouts and speaker presentations are available online at
<https://ncc.expoplanner.com/cs17/handouts>.

SESSIONS

SESSION TOPICS AND TRACKS

- ◆ Emerging Research and Epidemiological Data
- ◆ Governance, Federal Law and Emerging Policy
- ◆ Prevention
- ◆ Public Health and Public Safety
- ◆ Regulatory Issues
- ◆ Science of Cannabis

SESSION TYPES

KEYNOTE SESSIONS Large sessions that are open to all in attendance and have no competing sessions. These sessions are used to set the tone and mood for the overall conference.

BREAKOUT SESSIONS Smaller sessions that are offered concurrently within the event. Sessions are on a first-come, first-served basis. Attendees should identify multiple sessions to attend during each time-frame in case their first choice is at capacity.

LUNCH & LEARNS Similar to Breakout Sessions, but in a more relaxed setting. Attendees should bring a box lunch (available in the Colorado Foyer) and will eat while they learn. A great opportunity for networking and discussion.

POSTER PRESENTATIONS Display of reports and papers accompanied by the author and/or researcher. These sessions are dedicated to discussion of the poster between the presenter and the interested attendee(s) during specific times. At other times, posters can be viewed by attendees, but the presenter may not be available for discussion.

EXPLORE DENVER

Welcome to Denver, where 300 days of sunshine, a thriving cultural scene, diverse neighborhoods and natural beauty combine for the world's most spectacular playground.

SEE A young, active city at the base of the Colorado Rocky Mountains, Denver's stunning architecture, award-winning dining and unparalleled views are all within walking distance from the pedestrian-friendly 16th Street Mall. Upscale shopping awaits in Cherry Creek, while Denver's eight professional sports teams entertain year-round.

EAT Denver is quickly gaining a reputation for its innovative young chefs and eclectic, diverse cuisine with a western flair. There are more than 2,000 restaurants in metro-Denver. The single greatest thing about Denver's thriving culinary scene is its dynamic visionaries, risk-takers and virtuosos – the chefs and restaurateurs who push the envelope, dare to be different and embrace an ever-changing food landscape. There's never been a better time to take a bite out of The Mile-High City.

DO Lined with 200 trees and 50,000 flowers, the festive, mile-long 16th Street Mall has 28 outdoor cafes and offers Denver's best people-watching. Renowned architect I.M. Pei designed the gray and pink granite pathway to resemble the pattern of a diamondback rattlesnake. After dark, horse-drawn carriages clatter up and down the Mall.

KEYNOTE SPEAKERS

MONDAY, AUGUST 28

Marijuana Legalization and Answers to Our “Drug Problem”

9:00 AM – 10:30 AM

John F. Kelly, Ph.D.

Elizabeth R. Spallin Associate Professor of Psychiatry in Addiction Medicine, Harvard Medical School

Emerging Research and Epidemiological Data

Real Options for Legalization

3:00 PM – 4:00 PM

Jonathan Caulkins, Ph.D.

H. Guyford Stever Professor of Operations Research, Carnegie Mellon University, Heinz College

Governance, Federal Law and Emerging Policy

Cannabis Legalization and Public Health

4:00 PM – 5:00 PM

Hilary Karasz, Ph.D., M.A.

Communications Program Manager and Public Information Officer, Seattle & King County

Public Health and Public Safety

4:00 PM – 5:00 PM

Beau Kilmer, Ph.D.

Co-director, RAND Drug Policy Research Center

Public Health and Public Safety

KEYNOTE SPEAKERS

TUESDAY, AUGUST 29

Regulatory Issues and Marijuana Legislation from a State Perspective

9:00 AM – 10:00 AM

John Carnevale, Ph.D.

President, Carnevale
Associates, LLC

Regulatory Issues

9:00 AM – 10:00 AM

Rick Garza

Director, Washington State
Liquor and Cannabis Board

Regulatory Issues

Regulatory Issues and Marijuana Legislation from a State Perspective

9:00 AM – 10:00 AM

Lewis Koski, M.B.A.

Co-founder and Senior
Director, Freedman & Koski,
Inc.

Regulatory Issues

The State of the Science of Cannabis

2:15 PM – 3:15 PM

Susan Weiss, Ph.D.

Director, Division of
Extramural Research,
National Institute on Drug
Abuse

Science of Cannabis

WEDNESDAY, AUGUST 30

Let's Stop Asking, "Should We Legalize Marijuana?"

10:15 AM – 11:15 AM

Andrew Freedman, J.D.

Co-founder and President, Freedman & Koski, Inc.

Emerging Research and Epidemiological Data

DAILY SCHEDULE

SUNDAY, AUGUST 27

2:00 PM – 6:00 PM **Registration Open**

Colorado Foyer

MONDAY, AUGUST 28

8:00 AM – 4:00 PM **Registration Open**

Colorado Foyer

9:00 AM – 10:30 AM **Marijuana Legalization and Our Answers to Our “Drug Problem”**

**WELCOME AND
OPENING KEYNOTE**

Colorado Ballroom

John F. Kelly, Ph.D., Harvard Medical School

Emerging Research and Data

The remedy for our “drug problem” may be choosing the “least worst” solution. The rapidly changing social and policy landscape surrounding cannabis — both nationally and internationally — will solve some problems but will also create new challenges. Examine policy positions ranging from the most restrictive prohibitions through the full commercialized sale of cannabis for recreational use, and discusses the pros and cons of each.

9:00 AM – 6:30 PM **Poster Presentations Open**

Colorado Foyer

10:30 AM – 10:45 AM **Coffee Break**

Colorado Foyer

11:00 AM – 12:00 PM **The Policy Implications of Internet Behaviors Among Cannabis Dispensary Staff**

BREAKOUT A1

Mt. Harvard

Nicholas Peiper, RTI International

Emerging Research and Epidemiological Data

Direct-to-consumer advertising and health claims about cannabis have become widespread on the Internet and cannabis dispensaries have a strong presence on social networks like Twitter that provide an unregulated platform for dispensary staff to rapidly communicate with large consumer populations. Three studies investigated patterns of Internet behavior among dispensaries and budtenders in California with implications for development and validation of measures for the public health surveillance of Internet behaviors among the cannabis industry.

11:00 AM – 12:00 PM **Marijuana Policy Decisions: Municipal Regulatory Practices for Minimizing Youth Harms**

BREAKOUT A2

Mt. Princeton

Gilbert Mora, Behavioral Health Services, Inc.; Monica Sanchez, Los Angeles County Office of Education

Governance, Federal Law and Emerging Policy

What is the impact of legalized commercialization of cannabis on health, treatment, prevention and education systems? Get a comprehensive review of the potential impacts of various marijuana policy options based on collaborative input from stakeholders including educators, community groups, public health professionals, medical practitioners, business affiliates and legislators. Review proven strategies that limit youth access to marijuana through regulatory policy best practices relating to marijuana storefront dispensaries, personal use and commercial cultivation and delivery services.

DAILY SCHEDULE

MONDAY, AUGUST 28

11:00 AM – 12:00 PM **Legalization Across the Continent: Searching for Successful Regulatory Models**

BREAKOUT A3 Adam Orens, Marijuana Policy Group

Mt. Columbia *Regulatory Issues*

Different approaches to legalization are emerging as new markets develop across the U.S., Canada and Mexico as western U.S. cannabis markets mature. Examine how different regulatory approaches yield different benefits, drawbacks and regulatory outcomes as we focus on scope of legalization, jurisdictional approach the path to legalization and the effects of implementation deadlines and rulemaking timelines. Will a “successful” model emerge? Find out.

11:00 AM – 12:00 PM **Seeing Through the Smoke: Identifying and Engaging Cannabis Users (Advances in Cannabis Screening and Brief Intervention)**

BREAKOUT A4

Mt. Yale

Win Turner, Center for Behavioral Health Integration; Monica Wilke-Brown, Iowa Health Department

Prevention

Focus on two new public health strategies – the Cannabis Integrated Screener (CIS), a 16-item tool including frequency, method and reasons for use and the consequences of use and the Cannabis Brief Negotiated Interview (CBNI), a structured motivational enhancement intervention designed to quickly engage risky users in a non-judgmental conversation to develop internal discrepancies and promote change.

11:00 AM – 12:00 PM **Using Data to Develop a Public Health Approach to Prevent Drugged Driving: Spotlight on Marijuana**

BREAKOUT A5

Mt. Oxford

Richard Landis, Advocates for Human Potential; Aaron Williams, National Council for Behavioral Health (moderator)

Public Health and Public Safety

Despite the increased risk to public safety, little data on the incidence and prevalence of drugged driving exists, particularly as it relates to driving and marijuana use. There is no legal or scientific agreement about what constitutes impairment or how poly-drug use impacts impairment. As more states legalize or decriminalize recreational and medical marijuana, the need for a clearer picture of drugged driving becomes more urgent. The newly created National Minimum Dataset (NMDS) will also be presented.

11:00 AM – 12:00 PM **Update on Colorado’s Marijuana Impaired Driving Law and Policy**

BREAKOUT A6

Maroon Peak

Michael Elliott, MRE Legal Consulting; Glen Davis, Colorado Department of Transportation; Tamara Parris, Central East ATTC (moderator)

Regulatory Issues

In light of changes in cannabis policy, Colorado has deliberated extensively on how to best prevent impaired driving. The history of the policy deliberation, current law, how that law is working and how public education and other methods of prevention are contributing to reduce marijuana impaired driving will be examined.

DAILY SCHEDULE

MONDAY, AUGUST 28

11:00 AM – 12:00 PM **Recovery from Cannabis Problems in the United States**

BREAKOUT A7 John F. Kelly, Ph.D., Harvard Medical School

Mt. Wilson *Emerging Research and Epidemiological Data*

Despite increased access to and availability of cannabis combined with lower prices, little is known about how widespread exposure to cannabis will affect individuals' health and well-being, and even less is known about recovery from cannabis problems. Explore findings from a national sample of adults in the U.S. who have resolved a significant cannabis problem and compare prevalence, characteristics and recovery pathways to those resolving alcohol and other drug problems.

LUNCH & LEARN SESSIONS: Pick up your box lunch from the Colorado Foyer and proceed to a Lunch & Learn Session. Please enjoy your lunch in a more relaxed and interactive learning environment.

12:15 PM – 1:15 PM **The Science/Policy Gap: Unexpected Trends During Recreational Marijuana's Brief History and Emerging Challenges**

LUNCH & LEARN ML1

Maroon Peak

John Carnevale, Carnevale Associates LLC; Jonathan Caulkins, Carnegie Mellon University, Heinz College

Governance, Federal Law and Emerging Policy

The science/policy gap created by passage of recreational marijuana laws has resulted in unexpected trends and challenges. Where does the gap pose the most serious threat to effective implementation of practical regulations? Explore the sometimes-surprising results of changing policies on cannabis and examine emerging trends.

12:15 PM – 1:15 PM **Lessons from 10 Years of Cannabis Screening and Interventions in Colorado**

LUNCH & LEARN ML2

Melissa Richmond, OMNI Institute; Carolyn Swenson, Peer Assistance Services, Inc.

Mt. Yale *Prevention*

Screening, brief intervention and referral to treatment (SBIRT) is an established approach to identify individuals who use substances at risky levels to intervene early and prevent negative health consequences. To better understand cannabis use in a changing landscape, SBIRT Colorado conducted studies examining data on individuals who had been SBIRT-screened. Learn the findings from its research and lessons learned. The session also addresses needed research areas, including definitions of risk level based on quantity and frequency of use and cannabis' impact on health.

12:15 PM – 1:15 PM **Edible Policies in Four States/New Product Trial, Edible Use and Unexpected Highs**

LUNCH & LEARN ML3

Jane Allen and Camille Gourdet, RTI International

Mt. Oxford *Public Health and Public Safety*

Edible cannabis products accidentally consumed by children or overconsumed by adults has resulted in increased calls to poison control centers and emergency room visits. In response, Colorado and Washington, followed by Oregon and Alaska, have passed laws that specifically regulate manufacturing, packaging and labeling of retail marijuana edible products, but regulatory gaps remain that must be explored to protect public health. Examine existing policies that restrict the manufacturing, packaging and labeling of edible products.

DAILY SCHEDULE

MONDAY, AUGUST 28

12:15 PM – 1:15 PM **LUNCH & LEARN ML4**
Mt. Harvard

Indirect Impacts of City Medical Marijuana Regulations on Adolescent Marijuana Use: Investigating Perceived Risk and Perceived Accessibility of Marijuana Use as Mediating Factors

Katie Branson, UCLA Fielding School of Public Health

Public Health and Public Safety

Policy approaches to control legal substances are key to preventing and reducing use by young people, but very little is known about the impact of city-level medical marijuana regulations on youth marijuana use. Knowing how city policies regulating cannabis might change middle and high school students' perceptions of risk and accessibility. How these factors influence students' marijuana use will help find the balance between accommodating adult access to marijuana and minimizing negative impact on youth.

12:15 PM – 1:15 PM **LUNCH & LEARN ML5**
Mt. Columbia

Marijuana and Pregnancy: A Common Question with a Complex Answer

Kaylin A. Klie, Denver Health and Hospital

Science of Cannabis

With legalization of medical and recreational marijuana increasing across the country, use while pregnant, breastfeeding and mothering has become a concern for women and their health care providers. Review recommendations for screening pregnant women for marijuana use; explore current data regarding maternal, fetal and neonatal impact of marijuana in pregnancy and breastfeeding; and discuss the current medical/legal climate of screening, testing and reporting marijuana use in pregnant and breastfeeding women.

12:15 PM – 1:15 PM **LUNCH & LEARN ML6**
Mt. Princeton

A Fireside Chat: How Digital Tools Can Help with Prevention and Treatment

Tom Hill, National Council for Behavioral Health; Scott Cousino and Chuck Tepper, MyStrength

Prevention

Whether cannabis is used for medical or recreational purposes, it is important to educate the public about substance use disorders and how to prevent them. Digital tools are confidential, available 24/7 and grounded in empirically-supported findings. Learn about digital resources available on the web and via apps and tools to address chronic pain without developing opioid dependence.

1:45 PM – 2:45 PM **BREAKOUT B1**
Maroon Peak

The Impacts of Marijuana Legalization in Washington State

Steven Freng and Alison Wassall, Northwest High Intensity Drug Trafficking Area (NW HIDTA)

Emerging Research and Epidemiological Data

A data analysis conducted by Northwest High Intensity Drug Trafficking Area addresses the impact of legalization and commercialization of legalized cannabis possession and production in Washington state. The outcomes of legalization to date focus on the implications for current and future policy decisions.

DAILY SCHEDULE

MONDAY, AUGUST 28

1:45 PM – 2:45 PM **What Government Entities Can Learn from Colorado's Marijuana Regulatory Model**

BREAKOUT B2 Michael Elliott, MRE Legal Consulting

Mt. Columbia *Governance, Federal Law and Emerging Policy*

Colorado led the nation in cannabis reform. Learn from their experience on issues of safety, how to keep cannabis businesses accountable, taxation, preventing teen use, diversion to other states and more. Major aspects of Colorado's regulatory program will be addressed, comparing and contrasting it to other states' regulatory programs.

1:45 PM – 2:45 PM **The Role of Perception of Harm in Youth Marijuana Prevention**

BREAKOUT B3 Kristen Quinlan, Education Development Center; Maria Valenti, SAMHSA's Center for the Application of Prevention Technologies (CAPT)

Mt. Harvard

Prevention

Perception of harm (PoH) is an individual's assessment of the probability that a behavior will result in harmful consequences, but little is known about the role of PoH in preventing youth use of marijuana prevention. A deeper understanding of how PoH operates in evidence-based marijuana prevention is needed to establish effective, evidence-based prevention strategies.

1:45 PM – 2:45 PM **Live Free or Die? Finding Marijuana Middle Ground in Extreme Times — Lessons from New Hampshire**

BREAKOUT B4

Mt. Princeton

Traci Fowler, TF Consulting; Kate Frey, New Futures; Edgar Vargas, Northeast and Caribbean ATTC (moderator)

Public Health and Public Safety

Evolving marijuana policies have generated extreme points of view that often can't find middle ground. Advocates in New Hampshire successfully navigated a middle ground by maintaining a focus on youth, working in a bi-partisan way and engaging unlikely allies. Learn how they successfully used locally generated data, balanced public health and social equality, built public health and prevention coalitions and review the homegrown educational document that helped them reach a middle ground.

1:45 PM – 2:45 PM **Consumer Protection and Legal Marijuana in Denver**

BREAKOUT B5 Danica Lee, Public Health Inspections Division, Denver Environmental Health

Mt. Yale

Regulatory Issues

Consumer protection questions and concerns surround products made by the emerging legal cannabis industry in Colorado. Since 2010, the Denver Department of Environmental Health has regulated cannabis products by conducting consumer protection inspections and public health investigations. As the first health authority regulating cannabis products, Denver has a wealth of data and insight into the challenges of administering this unique regulatory program, including consumer protections concerns, industry characteristics contributing to these concerns, regulatory gaps and communication needs.

DAILY SCHEDULE

MONDAY, AUGUST 28

2:45 PM – 3:00 PM **Break**

Colorado Foyer

3:00 PM – 4:00 PM **Real Options for Legalization**

KEYNOTE Jonathan Caulkins, Ph.D., Carnegie Mellon University, Heinz College

Colorado Ballroom *Governance, Federal Law and Emerging Policy*

Legalizing cannabis responsibly requires creating and preserving policy options. There is much we don't know. How will it affect alcohol abuse, tobacco smoking, opioid overdose or use of other drugs? How do doses over 250 milligrams of THC daily affect overall health? Will the federal government legalize it and when? Will cannabis products be exempted from FDA regulation under the Food, Drug and Cosmetics Act? Will industry lobbyists or public health advocates have more clout with legislators and regulators? We will evaluate the societal goals and strategy of legalization from a real options perspective, leading to several concrete recommendations for how legalization could be managed more prudently than it is today.

4:00 PM – 5:00 PM **Cannabis Legalization and Public Health**

KEYNOTE Hilary Karasz, Ph.D., M.A., Seattle & King County; Beau Kilmer, Ph.D., RAND Drug Policy Research Center

Colorado Ballroom

Public Health and Public Safety

Dramatic changes in the cannabis policy landscape – especially in the Western Hemisphere – continue to drive debate about the consequences of legalization. As restrictions on cannabis ease worldwide, the impact on public health and safety remains a hot topic. Explore recent changes as we focus on 10 design choices that will shape the consequences of cannabis policy change: production, profit motive, promotion, prevention, policing and enforcement, penalties, potency, purity, prices and permanency.

DAILY SCHEDULE

MONDAY, AUGUST 28

5:00 PM – 6:30 PM

NETWORKING RECEPTION AND POSTER PRESENTATIONS

Colorado Foyer

Presenters will be available for discussion during this time.

POSTER PRESENTATIONS

Measuring the Social Climate for Cannabis Use in the U.S.

Matthew Farrelly, RTI International

Do people in states where cannabis is legal perceive the benefits and risks associated with use differently than those who live in states where it's not legalized? This study examines how the social climate around cannabis use and legalization may be evolving and determines the factors driving differences in social norms.

Do Medical Marijuana Dispensaries Increase Car Crashes? Evidence from Oregon

Steven Davenport, Pardee RAND Graduate School

Many fear cannabis legalization will lead to increased impaired driving under the influence. But is it possible cannabis legalization may improve road safety instead? Traffic data from the Oregon Department of Transportation and data from both registered and unregistered marijuana dispensaries will help shed light on this critical issue.

Synthetic Cannabinoids and Cannabis: An Exploratory Study

Bryce Pardo, BOTEC Analysis

Increasing use of synthetic cannabinoids (SCRA) is a public health concern, but little is known about the relationship between SCRA and cannabis. Does greater access to cannabis have a negative impact on exposure to and use of SCRA? This empirical assessment of consumer behavior revealed a preference for cannabis over SCRA.

Drugs Kill Dreams: Reducing Youth Access to Marijuana

Jennifer Harris, Behavioral Health Services, Inc.

With greater access to marijuana, there is a decreased perception of harm associated with its use and increased social acceptance among youth. We need to shift the social norm in our communities and decrease youth access through strategic planning, education and advocacy. The Strategic Prevention Framework (SPF) can help you create a plan of action.

Primary and Non-Primary Marijuana Using Youth in Recovery: Outcomes Differences

Rachel Gonzales-Castaneda, UCLA Integrated Substance Abuse Programs

Little is known about the psychosocial and behavioral impacts of cannabis use among youth who are receiving substance use disorder (SUD) treatment. Explore differences in psychosocial and behavioral outcomes at treatment discharge between youth in treatment for cannabis compared to youth in treatment for other substances.

DAILY SCHEDULE

MONDAY, AUGUST 28

Vehicle Accidents Related to Marijuana Among U.S. High School Seniors

Steven Curry, Westat

Vehicle accidents are the leading cause of death among adolescents in the U.S. and there is evidence that marijuana-impaired driving may be increasing. Examine the frequencies of self-reported vehicle accidents that occurred after smoking marijuana and the research that will inform policy and law, personal behavior and future research.

Perceived Harmfulness of Marijuana Relative to Alcohol

Jane Allen, RTI International

"If marijuana were as widely available as alcohol, which do you think would be more harmful to society?" That's just one question on RTI International's national marijuana survey. Data from RTI's Oregon and national marijuana surveys examined characteristics associated with perceptions of the relative harmfulness of cannabis and alcohol.

Drugged Driving in a National Sample of Marijuana Users

Lauren Dutra, RTI International

The impact of legalization of cannabis and other influences on trends in drugged driving has not been investigated. We must understand the factors associated with driving under the influence of marijuana to prevent it. This national survey examines differences in marijuana-related attitudes, beliefs, knowledge and behavior influenced by cannabis legalization

The Relationship Between Cannabis Use and Youth Anti-Social Behavior

Ivy DeFoe, University of Pennsylvania

Rule-breaking and anti-social behavior have been linked with adolescent cannabis use, but does cannabis use predict conduct problems or do conduct problems predict cannabis use? The question becomes more critical as trends toward cannabis legalization lead to greater access among adolescents. This four-year longitudinal study examines cannabis use and conduct problems in adolescents ages 11-17.

Relative Interest in Marijuana Content Reflected Through Digital Resources

Scott Jones, IQ Solutions

Marijuana-topic Internet search and website data can provide a critical snapshot of public interest. This evaluation of general Internet searches, specific websites, social media and blogs will show how interests have changed over time, what potential effects public health messaging has had on these interests and possible future impact.

Non-Medical Versus Medical Marijuana Use Among Three Age Groups of Adults

Namkee Choi and Diana DiNitto, University of Texas at Austin

Increased medical and non-medical use across demographic groups makes understanding factors associated with their use more important than ever. This study focuses on the association of substance use and mental disorders, health conditions and pain interference in three age groups of adults — 18-29, 30-49, and 50+.

DAILY SCHEDULE

TUESDAY, AUGUST 29

8:00 AM – 4:00 PM	Registration Open	Colorado Foyer
9:00 AM – 10:00 AM	Regulatory Issues and Marijuana Legislation from a State Perspective KEYNOTE Colorado Ballroom John Carnevale, Ph.D., Carnevale Associates, LLC (moderator); Rick Garza, Washington State Liquor and Cannabis Board; Lewis Koski, M.B.A., Freedman & Koski, Inc. <i>Regulatory Issues</i> This moderated panel will discuss the challenges governments face when developing and implementing contemporary cannabis policy that commercializes an industry that was largely unregulated and illegal in advance of their efforts. Panelists will share their thoughts on lessons learned and the expansion of legalized cannabis along with their perspective on the future of cannabis policy.	
9:00 AM – 11:00 AM	Poster Presentations Open	Colorado Foyer
10:00 AM – 10:30 AM	Coffee Break and Poster Presentations Colorado Foyer Presenters will be available for discussion during this time. See page 16-17 for poster descriptions.	
10:30 AM – 11:30 AM	The Collaborative Path to Packaging and Labeling Standards BREAKOUT C1 Mt. Harvard Jordan Wellington and Chloe Grossman, Vicente Sederberg LLC <i>Governance, Federal Law and Emerging Policy</i> Why is it important to create national standards for cannabis packaging and labeling? A national stakeholder working group conducted a survey and combined the results with extensive research into FDA and other best practices to create a white paper detailing best practices and model regulations. Learn the theories behind why the work is important and some of the policy developments resulting from the project.	
10:30 AM – 11:30 AM	Overview of State Marijuana Legalization Policy: Implications for Public Health BREAKOUT C2 Mt. Columbia Gillian Schauer, Centers for Disease Control and Prevention Foundation; Mary Segawa, Washington State Liquor and Cannabis Board; Jay Butler, Association of State and Territorial and Health Officials Alaska Department of Health and Social Services, Division of Public Health; Andy Baker-White, Association of State and Territorial Health Officials; Randy Mayer, Iowa Office of Medical Cannabidiol <i>Public Health and Public Safety</i> Explore the public health and safety implications of cannabis legalization with representatives of states that have already implemented legislation. Panelists will share first-hand experiences and lessons learned, including an analysis of public health-related policy elements across the eight states with legal recreational/adult marijuana use, policies Washington state has put in place to protect public health, policy challenges and lessons learned from Alaska and emerging policy areas to watch with consideration for the protection of public health and safety as marijuana legalization policies continue to evolve. *Continue the conversation during the Lunch & Learn at 11:45 AM	

DAILY SCHEDULE

TUESDAY, AUGUST 29

- 10:30 AM – 11:30 AM
BREAKOUT C3
Mt. Princeton
- Harmonized Standards, Regulation, Quality Management and Public Health**
Jeremy Applen, ASTM International; Diana Padilla, Northeast and Caribbean ATTC (moderator)
Regulatory Issues
The lack of standards and regulations for cannabis producers, manufacturers and laboratories increases the risk of adulterated or misbranded products reaching consumers. Explore current issues in cannabis production, manufacturing and testing and how collaboration between regulatory, quality and public health professionals can advance harmonization, reduce the potential for adverse events and facilitate public health planning and policy development.
-
- 10:30 AM – 11:30 AM
BREAKOUT C4
Mt. Oxford
- Implementing Retail Marijuana Legalization: Public Health's Role in Implementation of Prevention and Education Efforts Following Legalization of Retail Marijuana**
Shannon Brietzman, Health Management Associates
Prevention
After a ballot initiative or legislation to legalize retail marijuana has passed, state agencies begin the complex process of implementation. Considerations include regulatory and programmatic needs to ensure safe and responsible adult use while preventing harm to vulnerable populations like children and adolescents. This overview of Colorado's experience creating and implementing a prevention and education program provides lessons learned, including making data-driven decisions, engaging diverse stakeholders, collaborating with state and local agencies and developing effective education campaigns.
-
- 10:30 AM – 11:30 AM
BREAKOUT C5
Maroon Peak
- Endocannabinoids: Defining the Health in Public Health Impact**
Jenny Wiley, RTI International
Science of Cannabis
Medicinal use of cannabis spans hundreds of years, yet only in the last several decades have scientists started to unravel the biological mechanisms underlying the therapeutic and intoxicating effects of this plant. This overview of the endogenous system through which it acts focuses on the brain. Plant-based cannabinoids contained in cannabis will be distinguished from endocannabinoids contained naturally in the body and synthetic cannabinoids. Understanding these dynamics will improve the impact on public health.
*Continue the conversation during the Lunch & Learn at 11:45 AM.
-
- 10:30 AM – 11:30 AM
BREAKOUT C6
Mt. Yale
- Marijuana Use, Marijuana Use Disorders and Related Problems Among Older Adults**
Namkee Choi and Diana DiNitto, University of Texas at Austin
Science of Cannabis
As more older adults use cannabis, an investigation of its consequences was conducted using the 2012-2013 National Epidemiologic Survey on Alcohol and Related Conditions and the 2008-2012 National Survey on Drug Use and Health. The results of this study provide much-needed insight into use patterns of adults 50+. Since more older adults are expected to use marijuana, care is needed in suggesting medical cannabis, screening for cannabis-related problems and ensuring those with problems get help.

DAILY SCHEDULE

TUESDAY, AUGUST 29

LUNCH & LEARN SESSIONS: Pick up your box lunch from the Colorado Foyer and proceed to a Lunch & Learn Session. Please enjoy your lunch in a more relaxed and interactive learning environment.

- 11:45 AM - 12:45 PM
LUNCH & LEARN TL1
Mt. Columbia
- Overview of State Marijuana Legalization Policy: Implications for Public Health**
Gillian Schauer, Centers for Disease Control and Prevention Foundation; Mary Segawa, Washington State Liquor and Cannabis Board; Jay Butler, Association of State and Territorial and Health Officials Alaska Department of Health and Social Services, Division of Public Health; Andy Baker-White, Association of State and Territorial Health Officials; Randy Mayer, Iowa Office of Medical Cannabis
- Public Health and Public Safety*
Explore the public health and safety implications of cannabis legalization with representatives of states that have already implemented legislation. (See full description on page 18.)
*This is a continuation of the Breakout Session at 10:30 AM.
-
- 11:45 AM - 12:45 PM
LUNCH & LEARN TL2
Mt. Wilson
- Effect of Enrollment in the New Mexico Medical Cannabis Program on Prescription Opioid Use in Chronic Pain Patients**
Sarah Stith and Jacob Vigil, University of New Mexico
- Public Health and Public Safety*
How does enrollment in a U.S. state-authorized Medical Cannabis Program (MCP) affect prescription opioid consumption in people with chronic pain? Despite higher initial use, a pragmatic retrospective cohort study conducted in New Mexico indicates that one year after enrollment, MCP patients reported no cannabis-related side-effects, significant pain reduction and improved quality of life, social life and activity levels.
-
- 11:45 AM - 12:45 PM
LUNCH & LEARN TL3
Mt. Princeton
- Mobilizing and Engaging Stakeholders for Community Change**
Cory Mashburn, Somerville Office of Prevention
- Public Health and Public Safety*
Youth cannabis use is a growing problem throughout the United States and many states with legalized use or legalized medical marijuana programs have trouble gaining support from key stakeholders to assist in prevention efforts. Learn how to make a case for prevention programs, intervention efforts and policy change using readily available local health data. At this interactive session, you'll examine strategies to build capacity and share local health data with key stakeholders within your community.
-
- 11:45 AM - 12:45 PM
LUNCH & LEARN TL4
Mt. Oxford
- Meet the Regulators: A Deep Dive into Marijuana Regulations**
John Carnevale, Carnevale Associates LLC; Rick Garza, Washington State Liquor and Cannabis Board; Lewis Koski, Freedman & Koski, Inc.
- Regulatory Issues*
Explore some of the challenges regulators faced in implementing cannabis regulations in their states. Learn first-hand some of the thornier regulatory matters confronted by two state regulators and ask the questions you need to know.

DAILY SCHEDULE

TUESDAY, AUGUST 29

- 11:45 AM - 12:45 PM **Endocannabinoids: Defining the Health in Public Health Impact**
LUNCH & LEARN TL5 Jenny Wiley, RTI International
 Maroon Peak *Science of Cannabis*
 Medicinal use of cannabis spans hundreds of years, yet only in the last several decades have scientists started to unravel the biological mechanisms underlying the therapeutic and intoxicating effects of this plant. This overview of the endogenous system through which it acts focuses on the brain. (See full description on page 19.)
 *This is a continuation of the Breakout Session at 10:30 AM..
-
- 1:00 PM - 2:00 PM **Marijuana in Colorado: Marijuana Use and Health Effects Data**
BREAKOUT D1 Daniel Vigil, Colorado Department of Public Health and Environment
 Mt. Harvard *Emerging Research and Epidemiological Data*
 When recreational marijuana sales began in Colorado in 2014, state health officials began monitoring trends in marijuana use and adverse health effects among the population who chose to consume. What data sources were available to accomplish these tasks? How were trends compared and interpreted without baseline marijuana use data prior to 2014? The Colorado Department of Public Health and Environment shares three years' experience collecting and analyzing cannabis use-specific data.
-
- 1:00 PM - 2:00 PM **Navigating Youth Prevention in the Age of Legal Marijuana**
BREAKOUT D2 Tara Dunn, Colorado Department of Public Health and Environment; Jess Neuwirth, State of Colorado; Kim-Monique Johnson, Training and Practice Implementation Institute (moderator)
 Mt. Princeton *Prevention*
 The Colorado Department of Public Health and Environment launched its youth cannabis prevention campaign, Protect What's Next, aimed at Colorado youth ages 12-20. It was built on research indicating the most compelling reason for youth not to use cannabis was that it could prevent them from reaching their immediate goals. A mix of digital strategies promotes pro-social, positive youth engagement while delivering accurate information on laws and health effects. Parents and trusted adults provide practical tips to encourage conversations with youth.
-
- 1:00 PM - 2:00 PM **Supporting Medical Cannabis with a Cannabis Dispensing Pharmacist**
BREAKOUT D3 Melani Bersten, Minnesota Medical Solutions LLC
 Maroon Peak *Public Health and Public Safety*
 Inadequate education and awareness directly impacts the overall quality of patient care in cannabis dispensaries. Abuses in dosage and use occur all too often. Education surrounding common cannabis drug interactions and side-effects is imperative combined with specific institutional policies for all members of the health care team, including methods of supporting medical cannabis patients. Implicit in this call to action is a respect for cannabis as a medicine and support of safe and effective self-medication for cannabis patients.

DAILY SCHEDULE

TUESDAY, AUGUST 29

1:00 PM - 2:00 PM

BREAKOUT D4

Mt. Oxford

Cannabis Use Disorder: Outcomes and Treatment

Thomas E. Freese, University of California, Los Angeles; Aaron Williams, National Council for Behavioral Health (moderator)

Science of Cannabis

Approximately one out of 12 cannabis users in the U.S. will develop cannabis use disorder (CUD). A current NIDA-funded investigation of functional outcomes – health, cognition and psychosocial – associated with cannabis use in individuals with CUD will focus on effects associated with early and chronic use, including school and work performance, medical conditions, cognition, quality of life and psychiatric symptoms. Evidence-based behavioral and pharmacological treatment approaches for CUD will also be outlined.

1:00 PM - 2:00 PM

BREAKOUT D5

Mt. Columbia

How Did We Get Here? History of State Cannabis Programs and Colorado Close-Up

Karmen Hanson, National Conference of State Legislatures

Regulatory Issues

With 20 years of experience regulating cannabis for medical and adult use, laws and regulations are constantly changing and, ideally, improving. Learn what other states have done, through both the voter-led initiative and legislative process lenses, from national and Colorado cannabis policy experts.

2:00 PM - 2:15 PM

Break

Colorado Foyer

2:15 PM - 3:15 PM

KEYNOTE

Colorado Ballroom

The State of the Science of Cannabis

Susan Weiss, Ph.D., National Institute on Drug Abuse

Science of Cannabis

Many of the laws around cannabis are rapidly changing, as are attitudes towards cannabis use. More research is needed, but we know that cannabis is associated with specific harms and many are exacerbated in users who start young and use often. Understanding the state of the science of cannabis provides a better understanding of how cannabis works to exert its diverse effects. We'll also identify critical research needs and opportunities, including those stemming from changing cannabis policies.

DAILY SCHEDULE

WEDNESDAY, AUGUST 30

8:00 AM – 11:30 AM **Registration Open**
Colorado Foyer

9:00 AM – 10:00 AM **Public Health Considerations for Legalized Marijuana Use**

BREAKOUT E1

Mt. Yale

Cynthia Hallett, American Nonsmokers' Rights Foundation; Aaron Williams, National Council for Behavioral Health (moderator)

Public Health and Public Safety

Despite public awareness that tobacco secondhand smoke (SHS) is harmful, many people still assume that marijuana SHS is benign. Despite evidence of it causing acute cardiovascular harm, lack of information about the constituents of marijuana SHS is frequently mistaken for evidence that it is harmless, despite chemical and physical similarity between marijuana smoke and tobacco smoke. Examine current local and state policy trends to regulate cannabis SHS like secondhand tobacco smoke by including it in smoke-free laws.

9:00 AM – 10:00 AM **How State and Federal Revenue Tools Can Serve Cannabis Policy**

BREAKOUT E2

Mt. Princeton

Patrick Oglesby, Center for New Review

Regulatory Issues

Government tax writers are behind the curve in dealing with cannabis. Potential revenue tools to advance cannabis policy that should be explored will be discussed, include taxing by price, weight, canopy, fossil fuel consumption and THC content; government sales; and denial of tax deduction for advertising and marketing.

9:00 AM – 10:00 AM **Cannabis and Congress: A Federal Policy Update**

BREAKOUT E3

Mt. Columbia

Andrew Kessler, Slingshot Solutions LLC

Governance, Federal Law and Emerging Policy

Changes to federal cannabis policies have taken a much slower pace than the states. In addition to the health and criminal justice aspects of cannabis use, federal policy focuses on research and trafficking as well. Over the last three years, we have seen more legislation introduced and champions of change are emerging in both chambers. Examine where we've been, where we are now and — most important — where we might be going in terms of federal involvement.

9:00 AM – 10:00 AM **Teen Culture and Marijuana Use: Which Teens are At-Risk?**

BREAKOUT E4

Mt. Wilson

Jeff Jordan, Rescue: The Behavior Institute

Prevention

Public health campaigns in numerous states are working to educate and discourage underage cannabis use. Many recent campaigns try to reach all teens, assuming they are equally at risk. However, research shows this isn't the case. By understanding the reasons behind the decision to use or not to use cannabis, campaigns can specifically appeal to those who are most at risk. Peer crowd segmentation identifies the macro-level connections between peer groups that influence teen values, beliefs and health-related behaviors.

DAILY SCHEDULE

WEDNESDAY, AUGUST 30
